

METHOD, DEVICE, AND NETWORK FOR PROVIDING SECURE
COMMUNICATION ENVIRONMENTS

ABSTRACT OF THE DISCLOSURE

The present invention is directed towards a method,
device, and network for providing secure communication
environments. In one form, a communication network
operable to provide a secure communication environment is
disclosed. The communication network includes a
communication device operable to request the secure
communication environment. The communication network
further includes a communication server operable to be
coupled to the communication device to enable the secure
communication environment.
